

# THE CORE OF CANNABIS VAPORIZATION

For a long time, the vape market was littered with unreliable products, many made with metal heating elements. This was a problem for oil manufacturers and extractors that often resulted in inconsistent temperatures, unpredictable flavors, leaching, and leaks.

These were all problems for consumers as well, who usually blamed the oil brands they knew, not the faulty hardware.

With the backing of Smoore International's world-class research and development, CCELL was created to cater to cannabis connoisseurs and brands around the world. Our first major innovation was the introduction of the ceramic heating core, revolutionizing the vaping experience by providing consistent temperatures, pure flavors, and eliminating the risks associated with metal heating elements.

# CCELL BY NUMBERS

Since

# 2016

Since creating the first-ever ceramic heating core in 2016, we have grown with the cannabis industry.

# 33M

 units

We are capable of producing 33 million units per month with our highly automated production lines.

# 42%

 market share

We have grown with our partner brands, who now account for 42% of sales among the Top 50 brands across 13 states, powering many of your favorite award-winning vapes.\*

# 9

 global R&D labs

We have nine R&D labs worldwide. Our team of PhDs at our lab in Arizona is full of cannabis research veterans working tirelessly to ensure CCELL products are equipped with the most cutting-edge and reliable vaporizer technology in the industry.

Trusted by

# 2,000+

 brands

Since our inception, we have been chosen by over 2,000 global brands across the US, Canada, Europe, and beyond.

\*BDSA data as of Q1 2024. Subject to change over time.

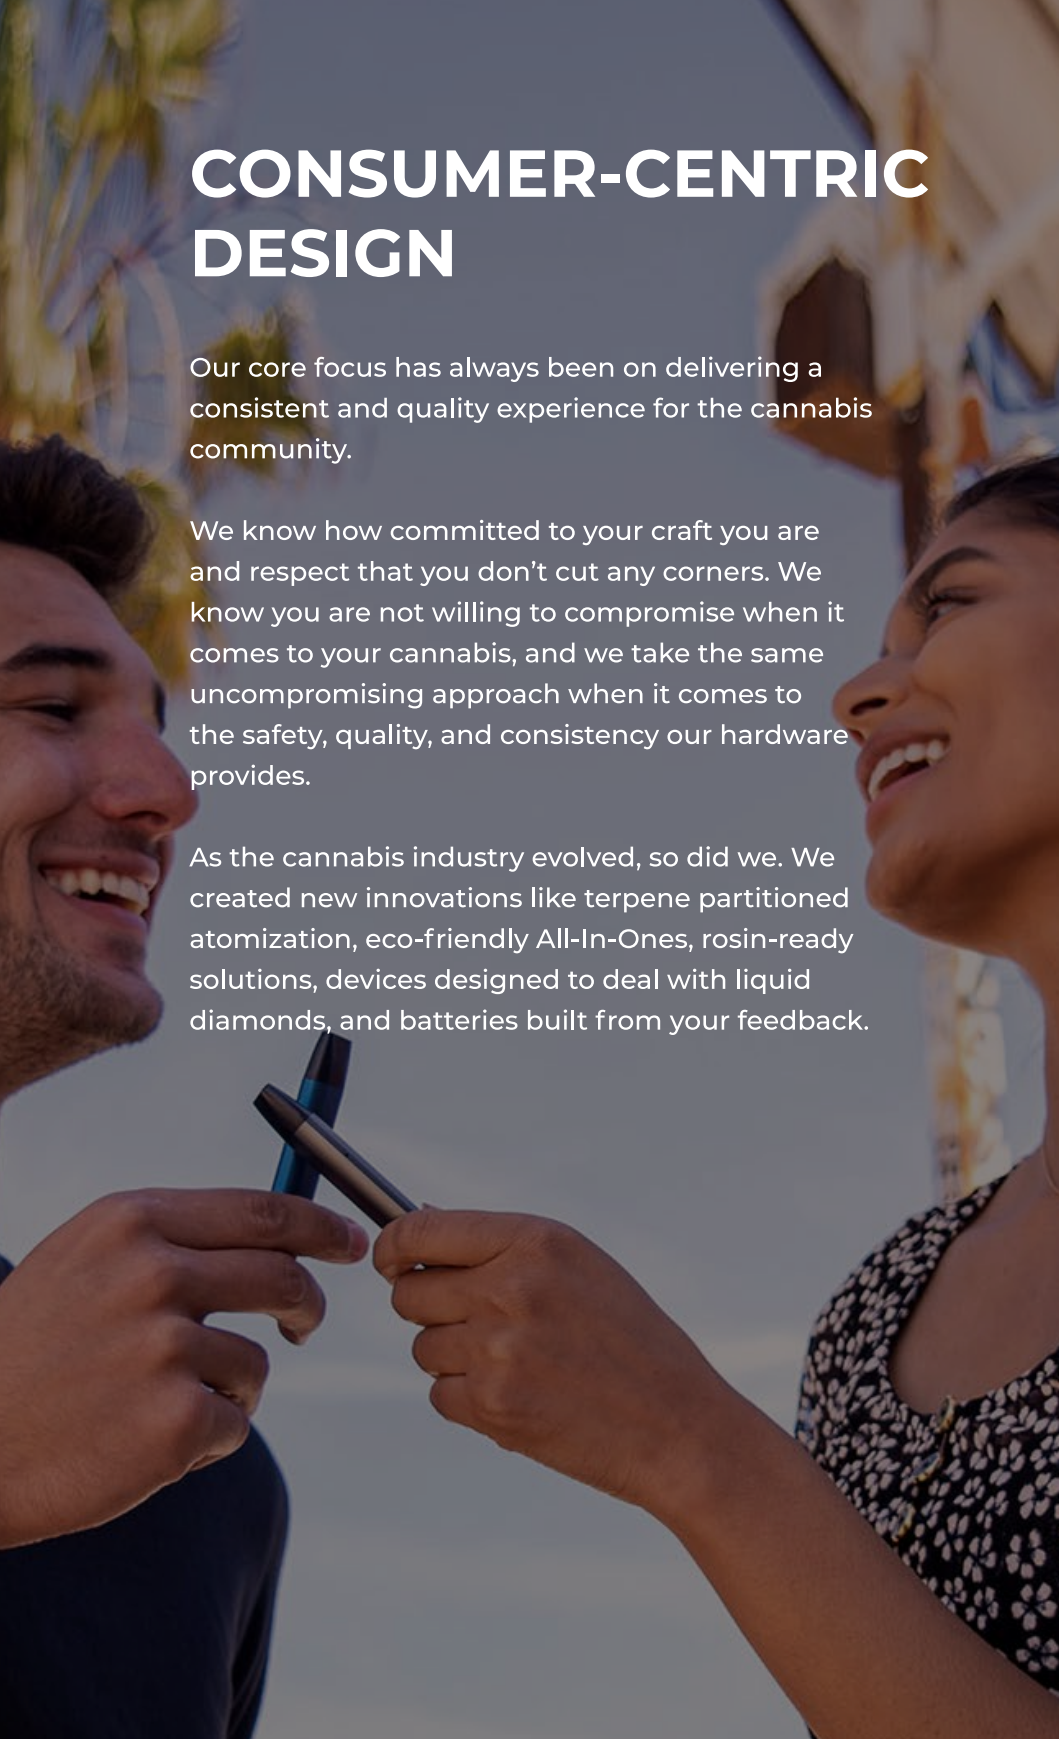

# CONSUMER-CENTRIC DESIGN

Our core focus has always been on delivering a consistent and quality experience for the cannabis community.

We know how committed to your craft you are and respect that you don't cut any corners. We know you are not willing to compromise when it comes to your cannabis, and we take the same uncompromising approach when it comes to the safety, quality, and consistency our hardware provides.

As the cannabis industry evolved, so did we. We created new innovations like terpene partitioned atomization, eco-friendly All-In-Ones, rosin-ready solutions, devices designed to deal with liquid diamonds, and batteries built from your feedback.

# AT THE CORE OF INNOVATION

With EVOMAX, we've created a state-of-the-art ceramic heating core designed to work flawlessly with any oil. Featuring improved heat distribution and meticulously optimized pores to handle oils of any viscosity, the EVOMAX core consistently delivers a clog-free, leak-free, and true-to-strain cannabis experience, regardless of the type of oil. Live rosins, liquid diamonds, live resins, distillates, and more are all completely compatible.

100% LIVE ROSIN AND

# FEATURED PRODUCTS

AT A GLANCE

## CARTRIDGES

### **M6T-EVOMAX** 0.5ml / 1ml

Thermoplastic cartridge built with a medical-grade stainless steel center post.

### **TH2-EVOMAX** 0.5ml / 1ml

Borosilicate glass cartridge built with a medical-grade stainless steel center post.

### **Ceramic-EVOMAX** 0.5ml / 1ml

Full ceramic cartridge engineered for the ultimate in flavor, vapor, and safety.

### **M6T-SE** 0.5ml / 1ml

Classic thermoplastic cartridge

### **TH2-SE** 0.5ml / 1ml

Classic borosilicate glass cartridge

# ALL-IN-ONES

## Tank 1ml / 2ml / 3ml

Large oil capacities, offering extended and uninterrupted experiences.

## Mini Tank 0.5ml / 1ml / 1.2ml

Miniature design, maximum discretion.

## Eco Star 0.5ml / 1ml

Earth-conscious device built with a removable, recyclable battery.

## Rosin Bar 0.5ml

100% rosin-ready. Innovative hardware designed to work with your solventless oils.

# ALL-IN-ONES

## Flex 0.5ml / 1ml / 2ml

Stylish design with customizable oil view window.

## Vision Box & Vision Box Elite

0.5ml / 1ml

Smart AIO devices featuring Anti-Burn technology and Smart Displays.

## Slym 0.3ml / 0.5ml / 1ml

Ultra-slim and lightweight, crafted with premium full-metal housing.

# BATTERIES

## Go Stik

Ergonomic, anti-slip body design.  
2 voltage settings (2.8/3.2V).

## Sandwave

Anti-slip wave design.  
3 voltage settings via slide switch (2.8/3.2/3.6V).

## Palm Pro

Airflow control.  
3 voltage settings (2.8/3.2/3.6V).  
10-second preheat function.

## Fino

Detachable Dock and Battery.  
8 voltage settings (2.2-3.6V).  
10-second preheat function.

# POD SYSTEMS

## Luster Pro 0.5ml / 1ml

3 wattage settings (6.5/7.5/8.5W)  
Preheat and child-resistant button  
Full metal housing

## Dart-X 0.5ml / 1ml

Full metal housing with soft touch finish.  
Motion-triggered LED indicator.

## Bellos 0.5ml / 1ml

Modern design with constant  
power output and haptic feedback.

“

I've never experienced a manufacturer who is so unwilling to compromise things like quality and performance. They are so focused on consistency, reliability, and safety, which allows us to help our customers be the best they can be.

**Patrick Mitchell**

Former Senior VP Inhalation and Accessories at Jupiter

“

CCELL is a partner that we love and that we want to continue to have because they are definitely the most innovative.

**Christopher Sinacori**

Founder & CEO at 3WIN

“

Some of the reasons we chose CCELL when I started the company: Number 1 safety. Number 2 reliability. And number 3 performance.

**Danny Allen**

Founder & CEO at Canna Brand Solutions

“

We chose CCELL over other brands due to the quality that they provide. Customers love their products too, as they don't have to return to their local dispensary to exchange any malfunctioning hardware.

**Jacob Ritter**

Sales Director, Aeriz

“

The best part about working with CCELL is the collaboration that we've had together. It's nice to be able to access their team of scientists, their state of the art cannabis lab, and their analytical data as it really helps me make a better oil in the long run. It's also nice to work with somebody that's on the forefront of technology and manufacturing because that's where we're trying to be.

**Joseph Kookoothe**

Manager of Lab Operations at MPX
